

SUMMARY

Software Engineer specializing in AI-driven systems, web development, and workflow automation. Experienced in building scalable applications, developing automation using Google Apps Script, and supporting Large Language Model (LLM) evaluation while working on Google projects at QualityAI.

SKILLS

- **Languages:** C++, Python, JavaScript
- **Web Technologies:** HTML, CSS, React.js, Next.js, Node.js, Django
- **Data & Visualization:** Power BI, NLP-based Analysis, Data Validation, Basic ML Applications
- **Tools & Automation:** Google Apps Script, Google Sites, Git, GitHub, VS Code, PyCharm
- **Databases & CS Fundamentals:** MySQL, SQLite, DSA, OOP, DBMS, Operating Systems, Computer Networks
- **Deployment:** Vercel, Render, Netlify

WORK EXPERIENCE

- **QualityAI (formerly Qualitest) | Client: Google** Feb 2026 – Present
Graduate Engineer
 - Developed internal web applications and automation solutions for Google using Google Apps Script, JavaScript, HTML, CSS, and Google Sheets.
 - Built and deployed a real-time project monitoring dashboard to automate project status tracking and reporting across initiatives.
 - Integrated Google Sheets as a backend data source with dynamic JavaScript-based rendering for live project health, ownership, priority, and workflow tracking.
- **Pedestal Techno World Pvt. Ltd.** Jan 2025 – Jun 2025
Full-Stack Development Intern
 - Developed and deployed full-stack web applications using Node.js, React, and MySQL for scalable and responsive systems.
 - Implemented RESTful APIs, user authentication, and database integrations for real-world use cases.

PROJECTS

- **Weekly Status Tracker** April 2026
Google Apps Script, JavaScript (ES6), HTML5, CSS3, Google Sheets API
 - Developed a full-stack web application to automate project status tracking and reporting using Google Apps Script and Google Sheets.
 - Built an interactive dashboard that displays real-time project health, ownership, priority levels, and workflow status.
 - Integrated Google Sheets as the backend database with dynamic rendering using JavaScript for live dashboard updates.
 - Implemented standardized workflow tracking (Not Started, In Progress, Blocked, Completed) to improve reporting consistency across initiatives.
- **Email AI Agent** November 2025
Built with Python, IMAP, SMTP, NLP
 - Built an automated Email AI Agent that reads Gmail inboxes, analyzes messages, and generates context-aware replies using NLP.
 - Implemented secure IMAP/SMTP with SSL/TLS and handled complex MIME/encoding formats for seamless email processing.
 - Designed a modular, scalable architecture enabling continuous automated email operations.
- **TeleCRM** May 2025
Designed with Node.js, MySQL & React
 - Designed a role-based system supporting Admin, Manager, and Field roles with real-time lead tracking and assignment workflows.
 - Architected an MVC-based backend with optimized SQL schemas to handle real-time CRUD operations and data persistence.
 - Built responsive front-end modules in React, improving team coordination through centralized, live lead status updates.

CERTIFICATIONS

- **Generative AI Fundamentals** – QualityAI
- **Google Apps Script** – QualityAI
- **Full Stack Developer Internship** – Pedestal Techno World Pvt. Ltd.
- **React JS Developer** – Udemy
