- Streamlit, REST APIs, Selenium
- Git, Docker
- Problem Solving & Debugging
- Communication & Team Collaboration

ACHIEVEMENTS

- **Full Stack Developer Internship** – Pedestal Techno World Pvt. Ltd.
- **React Js Developer** – Udemy
- **AI Aware 2022** – Intel

LANGUAGES

- English (Fluent)
- Hindi (Fluent)
- French (Basic)

EDUCATIONAL HISTORY

Bachelor of Technology in INFORMATION TECH.

Banasthali Vidyapith | 2021 – 2025

Senior Secondary School

Banasthali Vidyapith | 2020 – 2021

WORK EXPERIENCE

Pedestal Techno World Pvt. Ltd.

Full Stack Developer Intern | Jan - Jul 2025

- Developed TeleCRM during internship, handling full-stack tasks with Node.js, React, and MySQL.
- Implemented RESTful APIs, user authentication, and database integrations to support CRM functionality.

PROJECTS

Email AI AGENT

- Built an Email AI Agent in Python that automatically reads Gmail inboxes, analyzes message content, and sends context-aware replies. Implemented secure IMAP/SMTP with SSL/TLS, handled complex MIME/encoding formats, and designed a modular, scalable architecture for continuous operation.

TeleCRM - A Lead Management System

- Developed a full-stack, role-based TeleCRM lead management system using Node.js, Express, MySQL, PHP/XAMPP, and React, with dedicated modules for admins, managers, callers, and field agents. Implemented secure JWT authentication, real-time lead updates, and streamlined team coordination to boost workflow transparency and lead handling efficiency.

AI Resume Analyzer

- Built an AI-powered Resume Analyzer using Python, Streamlit, and NLP/ML tools to deliver ATS scoring, keyword gap analysis, and smart resume suggestions. Added job-market insights, LinkedIn scraping, and an interactive analytics dashboard, with secure SQLite-based authentication and automated document processing to streamline resume improvement.
